O'Brien & Gere has been providing environmental and industrial facilities services to industry for over 55 years. Our staff comprises of broadly experienced engineers and scientists who specialize in environmental, health & safety (EH&S) compliance strategies and management systems.

A comprehensive review of your facility provides the necessary information for O'Brien & Gere to identify applicable EH&S requirements and to develop a customized EH&S compliance calendar. This calendar is used to establish the basis for an environmental management services contract. Service contracts are tailored to the specific needs of your facility and may include such items as EH&S program development and maintenance, annual reporting, and permit updates.

O'Brien & Gere provides full-range EH&S compliance services and management system support including the following:

### **OVERALL EH&S MANAGEMENT SUPPORT**

- Strategic environmental management
- Compliance calendars
- Data management systems
- On-site retainer services
- EH&S training

- Health and safety compliance services (inspections, records, reporting, notifications, and postings)
- Emergency response/evacuation plans
- Hazard communication program
- Lockout/tagout program
- Respiratory protection program
- Hearing conservation program
- Industrial hygiene monitoring
- Ergonomics program
- Blood-borne pathogens program

## **ENVIRONMENTAL MANAGEMENT SYSTEMS BEYOND COMPLIANCE**

O'Brien & Gere can help you take control of your environmental compliance activities by assisting with the development and implementation of an EMS. An EMS organizes your environmental requirements into a planned structure to manage environmental issues proactively rather than reactively. This proactive system provides the framework to control environmental impacts, facilitate compliance with laws and regulations, and improve overall performance.

An effectively implemented EMS yields many rewarding benefits, including:

- Enhanced compliance status
- Reduced waste and pollution
- Reduced liability
- Reduced regulatory burden
- Improved public image
- Improved customer and employee satisfaction
- Cost savings
